ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, January 1963 Washington 25, D. C. April 1963

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

IMPORT STATISTICS TO BE PRESENTED IN TERMS OF THE 177 THREE-DIGIT SITC COMMODITY GROUPS

In the August 1962 issue of this report, it was announced that, beginning with the statistics for January 1963, Report No. FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin, would present commodity data in terms of the 177 three-digit commodity groupings of the U. N. Standard International Trade Classification (SITC) with a further segregation by the new Tariff Schedules of the United States Annotated (for statistical purposes). The President has not as yet announced the effective date of the new tariff schedules (TSUSA). Therefore, Report No. FT 110 for January 1963 and subsequent months will, until such time as TSUSA becomes effective, present Schedule A commodity number information grouped under the 177 three-digit SITC Commodity Groups in Country of Origin arrangement. Machine tabulations IM 145, IM 153, and other affected reference tabulations, releases and publications will be modified accordingly.

Reference listings showing under which three-digit SITC group each Schedule A number is located and showing which Schedule A commodities are grouped under each three-digit SITC group are presented in an article beginning on page ii of this report. As indicated in the August 1962 issue of this report, a printed report will be transmitted to all recipients of the regular Foreign Trade import publications presenting 1962 monthly data in the following arrangements:

1. Three-digit SITC Commodity Group by Country of Origin
2. Country of Origin by three-digit SITC Commodity Group

These reports are being prepared in order to provide users with 1962 data in terms of SITC. In addition, monthly and annual reference tabulations for 1962 will be prepared for imports on a three-digit SITC Commodity Group by Schedule A Commodity by Country of Origin basis.

CORRELATION BETWEEN SCHEDULE A COMMODITY NUMBERS AND SITC REVISED CLASSIFICATION NUMBERS

The following table presents each Schedule A commodity number in effect January 1, 1963 and the assigned SITC Revised group (3-digit) number. In some cases a Schedule A code contains merchandise which should be classified in two or more SITC codes. In such cases the assignment of SITC group codes was made on the basis of the composition of the Schedule A code with a determination of its principal content. This results in some SITC codes having no assigned Schedule A codes and some SITC codes being either overcounted or undercounted.

Schedule A number	SITC group	Schedule A number	SITC group	Schedule A number	SITC group	Schedule A number	SITC group	Schedule A number	SITC group	Schedule A number	SITC group

CORRELATION BETWEEN SITC REVISED CLASSIFICATION NUMBERS AND SCHEDULE A COMMODITY NUMBERS

(The following table presents the SITC Revised group (3-digit) classification numbers to which Schedule A commodity numbers in effect as of January 1, 1963, are assigned. In some cases a Schedule A code contains merchandise which should be classified in two or more SITC codes. In such cases the assignment of SITC group codes was made on the basis of the composition of the Schedule A code with a determination of its principal content. This results in some SITC codes having no assigned Schedule A codes and some SITC codes being either overcounted or undercounted.

SITC group	Schedule A number	SITC group	Schedule A number	SITC group	Schedule A number	SITC group	Schedule A number	SITC group	Schedule A number	SITC group	Schedule A number

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

Import commodity information is compiled in accordance with the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States. Effective with the statistics for January 1963, the Schedule A commodity information is arranged in terms of the Standard International Trade Classification, Revised, i.e., SITC section by SITC group by Schedule A commodity number by country of origin. The table beginning on page 6 of this report shows the SITC

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

section and group codes and their descriptions, along with import value totals for these classifications. This table replaces the table containing commodity group and subgroup information which appeared in previous issues of this report. To assist users of the statistics in locating the data for individual Schedule A commodities, the January 1963 issue of this report contains lists showing the correlation between the SITC and Schedule A classes in the following arrangements: (a) in Schedule A commodity number order showing the SITC group (3 digit) code for each Schedule A number and (b) in the order of the SITC group codes showing the Schedule A commodity numbers included in the SITC groups. It should be noted that in relating the Schedule A classifications to the Standard International Trade Classification there were instances where, because of differences in these two classification systems, it was necessary to assign some Schedule A commodity numbers to SITC groups on the basis of judgment. In some cases a Schedule A commodity number includes items which should be classified in two or more SITC codes. In such cases the assignment of the SITC group code was made on the basis of the composition of the Schedule A classification with a judgement of its principal content. As a result, there are some SITC codes to which no Schedule A commodity numbers have been assigned. In addition, there are some SITC codes which may be either overcounted or undercounted. In terms of the dollar value of the trade in the three-digit SITC groups, the overcounting or undercounting is not believed to be important. Copies of the above-mentioned correlation lists and the table containing SITC section and group codes and descriptions (but without the value data) may be obtained from the Bureau of the Census.

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. For complete definition of the individual Schedule A commodity classifications, reference should be made to Schedule A. Reference should also be made to the Standard International Trade Classification, Revised, (United Nations, New York, 1961- Statistical Papers, Series M, No. 34) for additional information regarding these classifications. The omission of a Schedule A commodity classification from this report indicates that no imports of that commodity valued at more than $100 reported on formal entries were reported in the statistics for the given period.

Effective January 1960, the initial reporting of imports on import entries is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D.A. attempts to minimize the difficulty of cross-classification between the tariff and statistical reporting requirements. The commodity information which is reported on the import entries in terms of U.S.I.D.A. codes is converted into the SITC groups and the Schedule A commodity classifications for presentation in the published import statistics.

Data on SITC Basis for Periods Prior to 1963

With the change in presentation of the Schedule A commodity data in terms of the Standard International Trade Classification, Revised, users may wish to have information for periods prior to 1963 arranged in terms of the SITC, in order to make comparisions between the 1963 statistics and those for earlier periods. For 1962, monthly and annual data in the same basic arrangement as the statistics in this report, i.e.,SITC group by Schedule A commodity number by country, are contained in machine tabulations which are available for use at principal reference locations. In addition, in order to make available as much information on the SITC basis as resources would permit, publications have been prepared containing 1962 monthly and annual value totals in SITC section by SITC group by country of origin arrangement and in country by SITC section by SITC group arrangement. The monthly and annual data are presented in separate publications. These publications also contain correlation lists in Schedule A commodity number by SITC group arrangement and in SITC group by Schedule A commodity number arrangement. The 1962 monthly data in the above-mentioned machine tabulation and in the publication do not include any revisions made subsequent to the release of the original monthly statistics but revisions to these statistics, in SITC group by country and in country by SITC group arrangements, are presented as a supplement in the publication. The 1962 annual data in the machine tabulation and in the publication reflect all revisions published with the 1962 monthly statistics. Additional information regarding these 1962 statistics in SITC arrangement and information concerning the availability of data for prior periods in terms of the SITC classifications may be obtained from the Bureau of the Census.

Estimated Data for Low-Valued Imports

Since January 1958, the data for Schedule A commodity classifications, with the exception of commodity number 9999 500, have excluded information on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250). In addition, effective January 1963, the individual commodity classifications exclude data on warehouse withdrawals for consumption valued under $100. It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are shown by country under Schedule A commodity number 9999 500 and are included in the totals for SITC group 990, SITC section 9 and the over-all import total. The estimates are also included in the totals for individual countries as published in Reports FT 950-I and FT 120.[3] Although subject to considerable sam-

[3] See Report No. FT 930-1 for handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

pling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

Descriptions of the special handling of the low-valued shipments in effect prior to January 1958 are carried in the publications for those periods. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Classifications for Which Only Quantity Information is Reported

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity-only commodity classifications which are excluded from the statistics are compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D.C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (See "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[5] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included in current issues of this re-

[4] The estimated total for low-value imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group.

[5] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

port and other statistical publications, or in special announcements accompanying the regular publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g., "Cattle" and "Manganese ore," Schedule A commodity numbers 0010 600-0010 900 and 6211 000-6211 300, respectively)]

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, February 1963. Washington 25, D. C. June 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

NEW EDITION OF UNITED STATES IMPORT DUTIES ANNOTATED FOR STATISTICAL REPORTING TO BE ISSUED EFFECTIVE JULY 1, 1963

A July 1, 1963 edition of USIDA will be available shortly. This edition will reflect the second stage of rate of duty changes made in the 1960-1961 GATT negotiations at Geneva.

Sales copies of the new edition of USIDA are expected to be available, beginning about June 17, 1963, at the office of the Superintendent of Documents, Government Printing Office, Washington 25, D.C. They may also be obtained through offices of Collectors of Customs and Department of Commerce Field Offices. The price is $4.00 per copy; $1.00 additional for foreign mailing.

Importers and Customs Brokers, particularly, are urged to obtain copies of the publication promptly when it is issued, to apprise themselves of information that will be required to be shown on import entry and withdrawal forms effective July 1, 1963.

IMPORT DATA AVAILABLE PRIOR TO RELEASE OF PRINTED REPORT

A service exists whereby users of this report may receive selected information from it about two weeks prior to the release of the printed report. This service is available on payment of the cost of making and transmitting a special copy of the selected information. The cost for this service generally runs a few dollars a month for one or two commodity classifications, the cost being higher if a large number of figures are requested. These "advance" reports are described in the November 1962 issue of this report and new "advance" reports are listed (together with their cost) in monthly issues of this report when they are first started. These "advance" reports are also listed in the Catalog of U.S. Census Publications.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

Import commodity information is compiled in accordance with the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States. Effective with the statistics for January 1963, the Schedule A commodity information is arranged in terms of the Standard International Trade Classification, Revised, i.e., SITC section by SITC group by Schedule A commodity number by country of origin. The table beginning on page 6 of this report shows the SITC

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

section and group codes and their descriptions, along with import value totals for these classifications. This table replaces the table containing commodity group and subgroup information which appeared in previous issues of this report. To assist users of the statistics in locating the data for individual Schedule A commodities, the January 1963 issue of this report contains lists showing the correlation between the SITC and Schedule A classes in the following arrangements: (a) in Schedule A commodity number order showing the SITC group (3 digit) code for each Schedule A number and (b) in the order of the SITC group codes showing the Schedule A commodity numbers included in the SITC groups. It should be noted that in relating the Schedule A classifications to the Standard International Trade Classification there were instances where, because of differences in these two classification systems, it was necessary to assign some Schedule A commodity numbers to SITC groups on the basis of judgment. In some cases a Schedule A commodity number includes items which should be classified in two or more SITC codes. In such cases the assignment of the SITC group code was made on the basis of the composition of the Schedule A classification with a judgement of its principal content. As a result, there are some SITC codes to which no Schedule A commodity numbers have been assigned. In addition, there are some SITC codes which may be either overcounted or undercounted. In terms of the dollar value of the trade in the three-digit SITC groups, the overcounting or undercounting is not believed to be important. Copies of the above-mentioned correlation lists and the table containing SITC section and group codes and descriptions (but without the value data) may be obtained from the Bureau of the Census.

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. For complete definition of the individual Schedule A commodity classifications, reference should be made to Schedule A. Reference should also be made to the Standard International Trade Classification, Revised, (United Nations, New York, 1961-Statistical Papers, Series M, No. 34) for additional information regarding these classifications. The omission of a Schedule A commodity classification from this report indicates that no imports of that commodity valued at more than $100 reported on formal entries were reported in the statistics for the given period.

Effective January 1960, the initial reporting of imports on import entries is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D.A. attempts to minimize the difficulty of cross-classification between the tariff and statistical reporting requirements. The commodity information which is reported on the import entries in terms of U.S.I.D.A. codes is converted into the SITC groups and the Schedule A commodity classifications for presentation in the published import statistics.

Data on SITC Basis for Periods Prior to 1963

With the change in presentation of the Schedule A commodity data in terms of the Standard International Trade Classification, Revised, users may wish to have information for periods prior to 1963 arranged in terms of the SITC, in order to make comparisions between the 1963 statistics and those for earlier periods. For 1962, monthly and annual data in the same basic arrangement as the statistics in this report, i.e.,SITC group by Schedule A commodity number by country, are contained in machine tabulations which are available for use at principal reference locations. In addition, in order to make available as much information on the SITC basis as resources would permit, publications have been prepared containing 1962 monthly and annual value totals in SITC section by SITC group by country of origin arrangement and in country by SITC section by SITC group arrangement. The monthly and annual data are presented in separate publications. These publications also contain correlation lists in Schedule A commodity number by SITC group arrangement and in SITC group by Schedule A commodity number arrangement. The 1962 monthly data in the above-mentioned machine tabulation and in the publication do not include any revisions made subsequent to the release of the original monthly statistics but revisions to these statistics, in SITC group by country and in country by SITC group arrangements, are presented as a supplement in the publication. The 1962 annual data in the machine tabulation and in the publication reflect all revisions published with the 1962 monthly statistics. Additional information regarding these 1962 statistics in SITC arrangement and information concerning the availability of data for prior periods in terms of the SITC classifications may be obtained from the Bureau of the Census.

Estimated Data for Low-Valued Imports

Since January 1958, the data for Schedule A commodity classifications, with the exception of commodity number 9999 500, have excluded information on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250). In addition, effective January 1963, the individual commodity classifications exclude data on warehouse withdrawals for consumption valued under $100. It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are shown by country under Schedule A commodity number 9999 500 and are included in the totals for SITC group 990, SITC section 9 and the over-all import total. The estimates are also included in the totals for individual countries as published in Reports FT 950-I and FT 120.[3] Although subject to considerable sam-

[3] See Report No. FT 930-1 for handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-1 for the handling in the reports by Customs District.

pling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

Descriptions of the special handling of the low-valued shipments in effect prior to January 1958 are carried in the publications for those periods. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Classifications for Which Only Quantity Information is Reported

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity-only commodity classifications which are excluded from the statistics are compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D.C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (See "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[5] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included in current issues of this re-

[4] The estimated total for low-value imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group.

[5] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

port and other statistical publications, or in special announcements accompanying the regular publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g., "Cattle" and "Manganese ore," Schedule A commodity numbers 0010 600-0010 900 and 6211 000-6211 300, respectively)]

ACKNOWLEDGEMENTS

Foreign Trade Division: Operations and Analyses, Joseph H. Freeman, Chief; Commodities, Victor O. McNabb, Chief; Policy and Regulations, Audrey Ratchford, Chief; Methods and Evaluation, Leonard R. Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, March 1963. Washington 25, D. C. July 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

NEW EDITION OF UNITED STATES IMPORT DUTIES ANNOTATED FOR STATISTICAL REPORTING TO BE ISSUED EFFECTIVE JULY 1, 1963

A July 1, 1963 edition of USIDA will be available June 21, 1963. This edition will reflect the second stage of rate of duty changes made in the 1960-1961 GATT negotiations at Geneva.

Sales copies of the new edition of USIDA are expected to be available, beginning about June 17, 1963 at the office of the Superintendent of Documents, Government Printing Office, Washington 25, D.C. They may also be obtained through offices of Collectors of Customs and Department of Commerce Field Offices. The price is $4.00 per copy; $1.00 additional for foreign mailing.

Importers and Customs Brokers, particularly, are urged to obtain copies of the publication promptly when it is issued, to apprise themselves of information that will be required to be shown on import entry and withdrawal forms effective July 1, 1963.

NEW SCHEDULE A COMMODITY NUMBERS BEING USED FOR COMPILING IMPORT STATISTICS

Effective with the January (see footnote 1) and February 1963 statistics certain Schedule A numbers became obsolete and new or revised classifications were established. The following is a list of these new or revised Schedule A classifications:

Schedule A commodity number	Commodity Description	Unit of quantity
	Grained, embossed, etc., of fancy leather:	
	Goat and kid (include gold and silver):	
0344 000[1]	Genuine (formerly 0346 500[7/62])	Sq. ft.
0344 100[1]	Plastic or imitation fancy leather, dutiable by similitude (par. 1559) (formerly part of 0346 900[7/62])	Sq. ft.
	Other:	
	Genuine:	
0344 200[1]	Calf and kip (formerly 0346 200[7/62])	Sq. ft.
0344 300[1]	Cattle (formerly 0346 000[7/62])	Sq. ft.
0344 400[1]	Other (include sheep and lamb) (formerly 0346 600[7/62])	Sq. ft.
0344 500[1]	Plastic or imitation fancy leather, dutiable by similitude (par. 1559) (formerly part of 0346 900[7/62])	Sq. ft.
1250 380	Capers in brine or otherwise preserved (from 1250 900 [1/60])	Lb.
	Edible preparations for human consumption, n.e.s.:	
1250 880	Containing over 20% by weight of butterfat and not packaged for retail sale (from 1250 900 [1/60])	...
	Cotton zipper tape:	
3230 271	Cotton zipper tapes, with teeth, scoops, spirals, or other closing mechanisms attached (formerly part of 3230 272[10/62])	Lb.
3230 273	Cotton zipper tapes, n.e.c. (formerly part of 3230 272[10/62])	Lb.
	Filaments, etc., non-cellulosic (nylon, etc.):	
3810 080	Acrylic fiber (formerly part of 3810 090[1/60])	Lb.
3810 095	Other non-cellulosic fibers (formerly part of 3810 090[1/60])	Lb.
9850 665[2]	Manufactured products laminated, of which any synthetic resin or resin-like substance is the chief binding agent, n.s.p.f. (formerly part of 9850 670)	Lb.
9850 675[2]	Manufactured products not laminated, of which any synthetic resin or resin-like substance is the chief binding agent, n.s.p.f. (formerly part of 9850 670)	Lb.

[1]These numbers will be made retroactive to January 1, 1963 and the statistics will be revised accordingly by errata.

[2]These numbers not presently shown in the 1963 correlation table are included in the 3-digit SITC group 893.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No.FT 985 Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

Import commodity information is compiled in accordance with the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States. Effective with the statistics for January 1963, the Schedule A commodity information is arranged in terms of the Standard International Trade Classification, Revised, i.e., SITC section by SITC group by Schedule A commodity number by country of origin. The table beginning on page 5 of this report shows the SITC

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

section and group codes and their descriptions, along with import value totals for these classifications. This table replaces the table containing commodity group and subgroup information which appeared in previous issues of this report. To assist users of the statistics in locating the data for individual Schedule A commodities, the January 1963 issue of this report contains lists showing the correlation between the SITC and Schedule A classes in the following arrangements: (a) in Schedule A commodity number order showing the SITC group (3 digit) code for each Schedule A number and (b) in the order of the SITC group codes showing the Schedule A commodity numbers included in the SITC groups. It should be noted that in relating the Schedule A classifications to the Standard International Trade Classification there were instances where, because of differences in these two classification systems, it was necessary to assign some Schedule A commodity numbers to SITC groups on the basis of judgment. In some cases a Schedule A commodity number includes items which should be classified in two or more SITC codes. In such cases the assignment of the SITC group code was made on the basis of the composition of the Schedule A classification with a judgement of its principal content. As a result, there are some SITC codes to which no Schedule A commodity numbers have been assigned. In addition, there are some SITC codes which may be either overcounted or undercounted. In terms of the dollar value of the trade in the three-digit SITC groups, the overcounting or undercounting is not believed to be important. Copies of the above-mentioned correlation lists and the table containing SITC section and group codes and descriptions (but without the value data) may be obtained from the Bureau of the Census.

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. For complete definition of the individual Schedule A commodity classifications, reference should be made to Schedule A. Reference should also be made to the Standard International Trade Classification, Revised, (United Nations, New York, 1961-Statistical Papers, Series M, No. 34) for additional information regarding these classifications. The omission of a Schedule A commodity classification from this report indicates that no imports of that commodity valued at more than $100 reported on formal entries were reported in the statistics for the given period.

Effective January 1960, the initial reporting of imports on import entries is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D.A. attempts to minimize the difficulty of cross-classification between the tariff and statistical reporting requirements. The commodity information which is reported on the import entries in terms of U.S.I.D.A. codes is converted into the SITC groups and the Schedule A commodity classifications for presentation in the published import statistics.

Data on SITC Basis for Periods Prior to 1963

With the change in presentation of the Schedule A commodity data in terms of the Standard International Trade Classification, Revised, users may wish to have information for periods prior to 1963 arranged in terms of the SITC, in order to make comparisions between the 1963 statistics and those for earlier periods. For 1962, monthly and annual data in the same basic arrangement as the statistics in this report, i.e.,SITC group by Schedule A commodity number by country, are contained in machine tabulations which are available for use at principal reference locations. In addition, in order to make available as much information on the SITC basis as resources would permit, publications have been prepared containing 1962 monthly and annual value totals in SITC section by SITC group by country of origin arrangement and in country by SITC section by SITC group arrangement. The monthly and annual data are presented in separate publications. These publications also contain correlation lists in Schedule A commodity number by SITC group arrangement and in SITC group by Schedule A commodity number arrangement. The 1962 monthly data in the above-mentioned machine tabulation and in the publication do not include any revisions made subsequent to the release of the original monthly statistics but revisions to these statistics are presented as a supplement in the publication. The 1962 annual data in the machine tabulation and in the publication reflect all revisions published with the 1962 monthly statistics. Additional information regarding these 1962 statistics in SITC arrangement and information concerning the availability of data for prior periods in terms of the SITC classifications may be obtained from the Bureau of the Census.

Estimated Data for Low-Valued Imports

Since January 1958, the data for Schedule A commodity classifications, with the exception of commodity number 9999 500, have excluded information on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250). In addition, effective January 1963, the individual commodity classifications exclude data on warehouse withdrawals for consumption valued under $100. It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are shown by country under Schedule A commodity number 9999 500 and are included in the totals for SITC group 990, SITC section 9 and the over-all import total. The estimates are also included in the totals for individual countries as published in Reports FT 950-I and FT 120.[3] Although subject to considerable sam-

[3] See Report No. FT 930-I for handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

pling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

Descriptions of the special handling of the low-valued shipments in effect prior to January 1958 are carried in the publications for those periods. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Classifications for Which Only Quantity Information is Reported

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity-only commodity classifications which are excluded from the statistics are compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D.C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (See "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[5] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included in current issues of this re-

[4] The estimated total for low-value imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group.

[5] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

port and other statistical publications, or in special announcements accompanying the regular publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g., "Cattle" and "Manganese ore," Schedule A commodity numbers 0010 600-0010 900 and 6211 000-6211 300, respectively)]

Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, April 1963. Washington 25, D. C. July 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

NEW SCHEDULE A COMMODITY NUMBER EFFECTIVE MARCH 1963

Schedule A commodity number 7100 235, "Parts of radio phonograph combinations" (from 7100 970), was established effective with the March 1963 statistics. This commodity number is included in 3-digit SITC group 724.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

Import commodity information is compiled in accordance with the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States. Effective with the statistics for January 1963, the Schedule A commodity information is arranged in terms of the Standard International Trade Classification, Revised, i.e., SITC section by SITC group by Schedule A commodity number by country of origin. The table beginning on page 6 of this report shows the SITC

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

section and group codes and their descriptions, along with import value totals for these classifications. This table replaces the table containing commodity group and subgroup information which appeared in previous issues of this report. To assist users of the statistics in locating the data for individual Schedule A commodities, the January 1963 issue of this report contains lists showing the correlation between the SITC and Schedule A classes in the following arrangements: (a) in Schedule A commodity number order showing the SITC group (3 digit) code for each Schedule A number and (b) in the order of the SITC group codes showing the Schedule A commodity numbers included in the SITC groups. It should be noted that in relating the Schedule A classifications to the Standard International Trade Classification there were instances where, because of differences in these two classification systems, it was necessary to assign some Schedule A commodity numbers to SITC groups on the basis of judgment. In some cases a Schedule A commodity number includes items which should be classified in two or more SITC codes. In such cases the assignment of the SITC group code was made on the basis of the composition of the Schedule A classification with a judgement of its principal content. As a result, there are some SITC codes to which no Schedule A commodity numbers have been assigned. In addition, there are some SITC codes which may be either overcounted or undercounted. In terms of the dollar value of the trade in the three-digit SITC groups, the overcounting or undercounting is not believed to be important. Copies of the above-mentioned correlation lists and the table containing SITC section and group codes and descriptions (but without the value data) may be obtained from the Bureau of the Census.

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. For complete definition of the individual Schedule A commodity classifications, reference should be made to Schedule A. Reference should also be made to the Standard International Trade Classification, Revised, (United Nations, New York, 1961- Statistical Papers, Series M, No. 34) for additional information regarding these classifications. The omission of a Schedule A commodity classification from this report indicates that no imports of that commodity valued at more than $100 reported on formal entries were reported in the statistics for the given period.

Effective January 1960, the initial reporting of imports on import entries is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D.A. attempts to minimize the difficulty of cross-classification between the tariff and statistical reporting requirements. The commodity information which is reported on the import entries in terms of U.S.I.D.A. codes is converted into the SITC groups and the Schedule A commodity classifications for presentation in the published import statistics.

Data on SITC Basis for Periods Prior to 1963

With the change in presentation of the Schedule A commodity data in terms of the Standard International Trade Classification, Revised, users may wish to have information for periods prior to 1963 arranged in terms of the SITC, in order to make comparisions between the 1963 statistics and those for earlier periods. For 1962, monthly and annual data in the same basic arrangement as the statistics in this report, i.e., SITC group by Schedule A commodity number by country, are contained in machine tabulations which are available for use at principal reference locations. In addition, in order to make available as much information on the SITC basis as resources would permit, publications have been prepared containing 1962 monthly and annual value totals in SITC section by SITC group by country of origin arrangement and in country by SITC section by SITC group arrangement. The monthly and annual data are presented in separate publications. These publications also contain correlation lists in Schedule A commodity number by SITC group arrangement and in SITC group by Schedule A commodity number arrangement. The 1962 monthly data in the above-mentioned machine tabulation and in the publication do not include any revisions made subsequent to the release of the original monthly statistics but revisions to these statistics, in SITC group by country and in country by SITC group arrangements, are presented as a supplement in the publication. The 1962 annual data in the machine tabulation and in the publication reflect all revisions published with the 1962 monthly statistics. Additional information regarding these 1962 statistics in SITC arrangement and information concerning the availability of data for prior periods in terms of the SITC classifications may be obtained from the Bureau of the Census.

Estimated Data for Low-Valued Imports

Since January 1958, the data for Schedule A commodity classifications, with the exception of commodity number 9999 500, have excluded information on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250). In addition, effective January 1963, the individual commodity classifications exclude data on warehouse withdrawals for consumption valued under $100. It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are shown by country under Schedule A commodity number 9999 500 and are included in the totals for SITC group 990, SITC section 9 and the over-all import total. The estimates are also included in the totals for individual countries as published in Reports FT 950-I and FT 120.[3] Although subject to considerable sam-

[3] See Report No. FT 930-1 for handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

pling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

Descriptions of the special handling of the low-valued shipments in effect prior to January 1958 are carried in the publications for those periods. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Classifications for Which Only Quantity Information is Reported

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity-only commodity classifications which are excluded from the statistics are compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D.C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (See "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[5] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included in current issues of this re-

[4] The estimated total for low-value imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group.

[5] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

port and other statistical publications, or in special announcements accompanying the regular publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g., "Cattle" and "Manganese ore," Schedule A commodity numbers 0010 600-0010 900 and 6211 000-6211 300, respectively)]
